

MODEL: G-WP-201-20B

Technical specification of 60 GPD water purifier

Four stage Reverse Osmosis Water Purification System designed for where feed water has very low water pressure or where the source water contains higher than normal amounts of dissolved solids.

Features:

- Brand : Heron
- Origin : China
- Filtration Stage : 2
- Capacity : 60 GPD
- Dimension : 78×30×23 CM
- Color : Blue (As given picture)
- Faucet : Hand faucet.

Filtration Process:

First Stage: Sediment Filter

The Sediment filter cartridge is manufactured from pure 100% polypropylene fibers. The fibers have been carefully spun together to form a true gradient density from outer to inner surfaces. It is effective in removing dust, mud, rust and sand particles.

Second Stage: Granular Activated Carbon Filter

This granular activated carbon filter is composed of high-performance activated carbon that effectively reduces unwanted tastes, odor, organic contaminants, chlorine, pesticides and chemicals that contributed to taste and odor. It is designed to allow maximum contact between the water and carbon, ensuring maximum adsorption.
