

MODEL: Hollow Tech U5

HOLLOW TECH

TENSION FREE TECHNOLOGY

SPECIFICATION

Brand	: Hollow Tech
Model	: U5
Capacity	: No tank needed
Filtration Stage	: Five
Water Type	: Normal
Dimension	: 17x 13x4.5 Inch
Country of Technology:	USA
Origin	: China
Technology	: Ultra Filtration

FILTRATION STAGES

STAGE 1: PP SEDIMENT FILTER (6-12 MONTHS)

Removes suspended solids, which are also known as sediment, turbidity, or particles. A sediment filter essentially functions like a net that catches unwanted particles as water flows through the system.

STAGE 2: ORGANIC COCONUT SHELL ACTIVATED CARBON (6-12 MONTHS)

Filters with organic granular activated carbon (GAC) is a proven element to remove Chlorine, Pesticides, Herbicides, THMS, VOCs, Benzene, Radon and other harmful chemicals.

STAGE 3: ORGANIC CARBON BLOCK (6-12 MONTHS)

Activated carbon block filtration offers a great solution for reduction of Chlorine, Sediments and other dissolved contaminants while improving taste and odor.

STAGE 4: ULTRA FILTER (12 MONTHS)

Ultra Filter (UF) is made of hollow fibers with a pore size of 0.1 micron. The Ultra Filter is effective for removing bacteria such as E. Coli, Bacillary Dysentery, Salmonella Cholera Bacteria and Tubercle Bacillus
