3	Hot Water Faucet	8	Electric Power Cord
4	Cold Water Faucet	9	Drain Plug
5	Drip Tray	10	Water Inlet

Note: The graphic is for reference only. The current device may have differences with the graphic.

#### Operation Process

1. Insert the bottle vertically on the seat and press the water faucets until water flows out of the red hot water faucet.

2. Insert the power plug to the wall socket and turn the electric switches to ON position to start the appliance. DO NOT MOVE BOTH SWITCHES AT THE TIME. Cooling and heating indicator lights should light up. The appliance is designed to provide hot or cold water whenever you need it. It will automatically turn on and off when the water reaches the desired temperatures.
